Tuesday. 9 AM. A Customer Success Manager.

Every Tool Knows 1/6 of the Truth.

Salesforce

Zendesk

Slack

Gong

Gmail

Mixpanel

No tool problem. An architecture problem.

Symptom Treatment. Not Synthesis.

Three answers to the wrong problem.

Gainsight

Health Score 65

...and now what?

Catalyst

Playbook triggered

...for what exactly?

ChurnZero

30 new alerts

...which one first?

What's missing?

We're building the layer that's missing.

Context Layer.

Customer Success live

Sales Q3

People & Ops Q4

CONTEXT LAYER

Entity Resolution | Temporal State | Source Attribution

DATA SOURCES

Salesforce | Zendesk | Slack | Gong | Gmail | Mixpanel

How the Context Layer Works.

Technical architecture & data flow.

[ARCHITECTURE DEEP-DIVE]

Content to be added

Let's take a look.

[Live demo
runs here]

One CSM. Two Hours Back. Every Day.

Direct effects per CSM, modeled on 40 accounts.

TIME-TO-ACTION

~~12 days~~ → **< 1 day**

MEETING PREP

~~20 min / meeting~~ → **0 min**

UNTOUCHED ACCOUNTS

~~35 % > 30 days~~ → **< 10 %**

CSM CAPACITY

~~40 accounts~~ → **60 accounts***

+5 Pts NRR · −25 % Churn

* at equal service depth. Modeled on B2B SaaS, $200M ARR cohort.

The only app that wants to get smaller the better it gets.
